

ALOR

WALLS & CEILINGS

A modern expression of natural beauty. Designed to bring warmth and visual continuity to modern interiors that celebrate simplicity and refined material expression.

Forté

COLLECTION OVERVIEW

The character of a space is defined not just by what fills it, but by the surfaces that frame it.

Walls and ceilings are more than structural elements – they set the tone, define the atmosphere, and create a sense of continuity within a space. Designed with this in mind, Alor Panelling brings the timeless beauty of timber into a refined, contemporary format.

Crafted in Spain with a real timber top layer, Alor Panelling combines natural authenticity with engineered precision. Premium-grade veneers highlight the richness and texture of wood, while 2.7m lengths create uninterrupted lines that elevate walls and ceilings with architectural elegance.

Whether in a private residence, a commercial setting, or a hospitality environment, Alor Panelling offers versatility and sophistication. It transforms interiors into spaces that feel connected, cohesive, and enduring – a balance of natural warmth and modern design. With Alor Panelling, timber is reimagined for today's interiors.

KEY FEATURES

Seamless Aesthetic

Alor Panelling comes in long 2.7m lengths, allowing full planks to be used on standard wall heights for a seamless look. Alor Panelling also comes in a Prime Grade, making it a cost-effective way to achieve a knot-free and clean architectural look.

Easy Installation

Alor Panelling is lightweight and easy to install with a Flexiclick locking joint profile. It can also be installed directly onto framing without gib, saving both cost and time.

Cost-Effective

Alor Panelling uses only 1/16th of natural timber resources compared to solid timber interior linings. This means it is not only more sustainable but more cost-effective too.
