

IMONDI

Imbued with texture, history and heart. Rustic surfaces hold an authentic story ready to be woven into interiors of character and craftsmanship.

Forté

## COLLECTION OVERVIEW

**Every surface holds the power to tell a story. With Imondi, that story is rich with history, character, and craftsmanship.**

Salvaged from forgotten places – old boats, weathered barns, even the wooden poles of Venice's canals – each plank begins life with a past, then is reimagined into something timeless.

Imondi is a collection that celebrates sustainability without compromise, transforming rescued wood into engineered planks of beauty and strength. The authentic textures, tones and imperfections remain, ensuring no two pieces are ever the same. Each surface carries its own identity, bringing depth, warmth, and intrigue to the spaces it inhabits.

Whether used to ground a home with rustic luxury, line the walls of a boutique hotel, or add soul to a modern commercial space, Imondi creates interiors that are both tactile and meaningful. Offered in a variety of finishes, colours, and patterns – from wide planks to Herringbone and Chevron – its versatility ensures it can be shaped to any vision.

Exclusively available in New Zealand through Forté, Imondi is a rare chance to weave history into the present, creating design legacies that endure.

## KEY FEATURES

### Authentically Reclaimed, Rich in Story

Every plank is crafted from salvaged timbers – from Venetian canal poles to old barns and boats – retaining its original character and infusing interiors with history and depth.

### Sustainable Luxury with Engineered Strength

Imondi combines handcrafted, rescued timber faces with a stable engineered base, maximizing material use while delivering impeccable quality, durability, and eco-certifications (FSC & LEED).

### Exclusive, One-of-a-Kind Design

With unique variations in texture, tone, and dimension, no two planks are alike – making every installation truly bespoke and exclusive to your project.
