

MILLBOARD DECKING

EXTERIOR DECKING

Built to endure the elements. Low maintenance with the look of real wood, designed to ensure you have more time for outdoor living.

Forté

COLLECTION OVERVIEW

Millboard reimagines outdoor living with a decking solution that blends the timeless beauty of wood with the resilience of cutting-edge materials.

Crafted from a unique mineral-limestone composition, each board is carefully hand-moulded from real oak samples, capturing the subtle grains, textures, and warmth of natural timber. Expertly hand-tinted by skilled craftsmen, every board delivers an authentic wood aesthetic that endures.

Unlike traditional timber, Millboard is entirely wood-free, meaning it resists rot, warping, and insect damage. Its non-porous, slip-resistant Lastane® surface repels moisture, stains, and algae, ensuring a clean, safe surface even in New Zealand's most demanding climates. UV-stable finishes preserve colour vibrancy over decades, while the impact-resistant, weatherproof construction stands up to sun, rain, frost and heavy, everyday use.

More than just decking, Millboard is a canvas for outdoor living – a low-maintenance, long-lasting alternative to timber that celebrates natural wood's aesthetic while exceeding its performance, with every board telling a story of craftsmanship, innovation and enduring quality.

KEY FEATURES

Authentic, Handcrafted Look

Each board is hand-moulded and coloured from real timber samples to replicate the natural beauty and texture of wood.

Durable & Weatherproof

Wood-free, moisture-resistant, UV-stable, and impact-resistant, Millboard decking withstands the elements without rotting, warping, or fading.

Safe & Easy to Install

Fire-rated, thermally efficient, and straightforward to fit with standard tools, Millboard provides long-lasting performance and peace of mind.
