

MUURO

Balancing natural warmth with refined architectural clarity. Creating a seamless finish for expressive, design-driven spaces that require a clean, minimalist aesthetic.

Forté

COLLECTION OVERVIEW

The character of a space is defined not just by what fills it, but by the surfaces that frame it.

Walls and ceilings are more than structural elements – they set the tone, define the atmosphere, and create a sense of continuity within a space. Designed with this in mind, Muuro brings the timeless beauty of timber into a refined, contemporary format.

Crafted in Spain with a real timber top layer, Muuro combines natural authenticity with engineered precision. Premium-grade veneers highlight the richness and texture of wood, while 2.7m lengths create uninterrupted lines that elevate walls and ceilings with architectural elegance.

Whether in a private residence, a commercial setting, or a hospitality environment, Muuro offers versatility and sophistication. It transforms interiors into spaces that feel connected, cohesive, and enduring – a balance of natural warmth and modern design. With Muuro, timber is reimaged for today's interiors.

KEY FEATURES

Seamless Aesthetic

Muuro comes in long 2.7m lengths, allowing full planks to be used on standard wall heights for a seamless look. Muuro also comes in a Prime Grade, making it a cost-effective way to achieve a knot-free and clean architectural look.

Easy Installation

Muuro is lightweight and easy to install with a locking joint profile. It can also be installed directly onto framing without gib, saving both cost and time.

Cost-Effective

Muuro uses only 1/16th of natural timber resources compared to solid timber interior linings. This means it is not only more sustainable but more cost-effective too.
