

## TACTILE

WALLS & CEILINGS

Offering a saw-marked finish and expressive tones. Deep grain and distinct tactility transform spaces into sensory experiences.

Forté

## COLLECTION OVERVIEW

**Tactile was created for those who see texture as not just a surface detail but an expression of warmth, craftsmanship and character.**

This premium engineered timber wall panelling brings a distinctive sensory dimension to interiors, transforming ordinary spaces into places of depth and sophistication.

Defined by its bold, saw-marked finish, Tactile captures the raw beauty of timber shaped by hand and history. Each wide 240mm plank is crafted from European Oak with a 4mm wear layer, ensuring both enduring strength and refined detail. Offered in two luxurious pre-finished tones, the collection delivers the perfect balance between natural authenticity and modern design.

Engineered for stability and ease of installation, Tactile makes achieving a bespoke look effortless. It's equally at home in luxury residences, boutique accommodations, or contemporary commercial environments – anywhere a sense of understated luxury is desired.

## KEY FEATURES

### Distinctive Textured Aesthetic

Tactile stands out for its heavily saw-marked surface – a bold, luxurious texture that adds depth and sophistication to any interior. It's the only Forté wall covering with this unique finish, making it a signature design choice.

### Easy Installation

Supplied pre-finished and designed in wide 240mm planks, Tactile is simple to work with and quick to install, making it an efficient way to achieve a high-end, textural finish with minimal on-site preparation.

### Premium Quality and Durability

Crafted from engineered European oak with a substantial 4mm wear layer and 15mm total thickness, Tactile delivers both beauty and durability.
