COLLECTION

Millboard is a premium UK-made decking product which is changing the face of decking as we know it. Millboard decking is made from a revolutionary Polyurethane resin, reinforced with mineral fibres, which retains the beautiful look and feel of wood, but without the maintenance needed to keep it that way.

Each decking board is moulded from carefully selected oak samples that showcase the beauty of natural wood grain, then hand-tinted by craftsmen for a perfect real-wood look. The result is decking that is virtually indistinguishable from wood in appearance, but far superior in performance. It doesn't rot or warp, and its UV stability resists fading. With no wood content, there's nothing to encourage algal growth either.

To add to its easy-to-live-with qualities, each board has a Lastane® surface layer which is both non-porous – so spills don't leave stains – and highly slip-resistant, even in the wet. There's no need to spend time applying expensive, often environmentally-unfriendly treatments to keep it looking beautiful.
